

# PATIENT SUPPORT CUSHIONS

## UNIQUE COMFORT CUSHIONS

This wedge can be used to support the body of the patient in different places. Shoulder paralyzes can be supported in this way.

Art. No. 32005/8A  
Small Wedge

The half cylindrical cushion can be put under the patient's back to increase comfort.

Art. Nr. 32005/15  
Half Cylindrical Knee Support

These blocks are used to support different parts of the body.

Art. No. 32005/4  
Small Block

Art. No. 32005/5  
Medium Block

Art. No. 32005/6  
Large Block

This combination assures that the hip and the feet are secured. In this way the pelvic area is immobilized.

Art. No. 32005/10  
Leg Support

Art. No. 32005/11  
Foot Support

Is used in combination with the HP base plate. This cushion provides a softer contact with the hard base plate. The pressure on the spinal cord can be reduced during the long waiting times of the treatment.

Art. No. 32005/2  
Trunkal Cushion

Is used in combination with the head supports. The head can be placed in hyper-extension as far as possible. This cushion also can be used in prone position.

Art. No. 32005/8  
Wide Wedge

The cylindrical formed knee cushions can be used individually or in combination with the leg support (32005/10) to increase the height of the knee position.

Art. Nr. 32005/14  
Cylindrical Knee Support

Art. No. 32006  
SET of 10 support cushions  
(containing all of the above)
