

## KNEE & LEG POSITIONING SET

An exact and comfortable position of the patient's legs is obtained by using the indexable knee & leg positioning set.

- An elevated position of the legs reduces stress in the patients back during the daily treatment fractions.
- Can be used as a knee support in supine and as an ankle support in prone treatment position.
- These cushions are also used as a reference point for setting up the other AIO Solution® cushion sets.
- The position of the cushion is easily reproduced by means of the millimeter scale and letter combinations.
